SUMMARY

Full-stack engineer with 4+ years of experience delivering revenue-driving features and internal tools for high-growth products. Experienced in building reliable API, automation systems, and access-controlled platforms that support scale and operational efficiency. Motivated by solving real business problems through thoughtful engineering.

EXPERIENCE

- Liminal Custody** Hyderabad, India
Software Engineer Sep 2025 – Present
 - **B2B Fintech Platform:** Working on an institutional-grade B2B SaaS platform for secure digital asset management and transactions.
 - **On-Chain Swaps Module:** Contributed to the Swaps module enabling clients to switch assets across chains through on-chain transaction workflows.
 - **Third-Party Provider Integrations:** Integrated and worked with external liquidity and infrastructure providers, with architecture designed to support multiple providers.
 - **Feature Migrations & Reliability:** Participated in feature swaps and module migrations, ensuring backward compatibility and minimal disruption for enterprise clients.
 - **Production Stability:** Resolved production issues across frontend and backend systems, improving reliability in a high-risk, regulated domain.
- Fresh Prints** Remote
Full-Stack Developer Apr 2022 – Jul 2025
 - **Revenue-Driving Checkout Platform:** Led development of a self-serve HQ Checkout & Member Portal, generating \$100K+ revenue within 3 months and improving conversion by 25%.
 - **Event-Driven Automation:** Designed and owned an event-driven microservice to automate CX lead assignment, reducing processing delays by 80%.
 - **Email Infrastructure Consolidation:** Unified transactional email pipelines across multiple vendors, enabling zero-downtime provider swaps and improving delivery reliability.
 - **Access & Permission Systems:** Built and scaled an identity, access & permission system, expanding roles from 24 to 37+ and reducing unauthorized access incidents by 30%.
 - **Platform Stability & Automation:** Improved application stability by 30% and automated license compliance workflows, reducing 40% manual operational effort.
 - **Early Contributions:** Built core admin modules and reusable UI components early in tenure, accelerating feature delivery by 20%.

SKILLS

- **Languages:** JavaScript, TypeScript, SQL, HTML5/CSS3
- **Frontend:** React, Next.js, AngularJS, Angular, Tailwind CSS, Storybook
- **Backend:** Node.js, Express, REST APIs, GraphQL, Redis, MySQL
- **Cloud & DevOps:** AWS (ECS, SQS, SES, CloudWatch), Docker, CI/CD
- **Architecture & Systems:** Identity & Access Systems, Event-Driven Architecture, Microservices, Distributed Systems
- **Security & Reliability:** Authentication & Authorization, Server-Side Validation, Reliable Backend APIs
- **Product Engineering:** Metrics-Driven Development, Internal Tools, Customer-Facing & Automation Platforms
- **Tools & Process:** Git, Jira, Agile/Scrum, Mixpanel, Iterable

SIDE PROJECTS

- **DIFY Buddy — AI Productivity Assistant:** Chat-first AI-powered journaling and habit coaching assistant focused on reflection, goal tracking, and behavioral insights. Built with a scalable frontend and cloud-backed workflows.
- **Stock Buy Average Calculator:** Web-based tool to calculate real-time average stock prices during volatile market conditions using live market data APIs.

EDUCATION

- **Vishwakarma Institute of Technology** Pune, India
Bachelor of technology - Computer Engineering ; GPA: 8.64 Aug 2018 - July 2022
